

Six Conditions Review: Application Note

SCR-6-24 • Current edition

Scope

SCR-6 is not a numerical score. It is a common review frame used when more than one Meridian discipline contributes to an operating condition. Six conditions and primary handoff ownership Condition Primary reference Supporting divisions Position MPS / PCP MTS, MBI Approach MQT MPS, MBI Sequence MQT MPS, MBI Atmosphere MA MQT, MNM Persistence MNM MA, MTS Response MBI MQT, MA

Method

A review records the conditions that need to remain coherent, the division holding the primary definition and the handoff condition another division must preserve. The result is a traceable operating note, not an overall performance number.

Revision history

2021 / First issue Established six conditions for Meridian One programme reviews. 2024 / Current edition Aligned handoff ownership with MCS-01 and current division methods.
